## PROJECT UPDATE

The I-70 Phase 2D project is in its 31st month of construction.

Construction activities completed in September included pouring the concrete deck (driving surface) of the new bridges, milling (removing the top surface of pavement) on I-70, and full-depth paving construction on South Street.

In October, crews will open the new lanes on first westbound, then eastbound I-70, then complete final surface paving on I-70. Paving will be complete by the second week of November, weather permitting.

Other remaining work includes painting the steel girders on the bridge, staining the bridge pier (central support) and parapets (walls), and completion of a storm water management pond.

For everyone's safety, please drive carefully, stay alert and reduce speed when traveling within the project work zone.

**We request that the public not trespass in construction areas.**
